

AG+ Auto Ship

If you're using the Everfresh Chemical System, you should be replacing your AG+ Silver ION cartridge every 4 months. Sign up for our AG+ Auto Ship program and receive a cartridge at your doorstep every 4 months with FREE SHIPPING. Call Karen at 301-607-4670, email her at karen@hotspringdc.com or sign up at one of our VIP nights. This is an easy way to be reminded to change your cartridge!

Hot Springs at Saks

We had one of our hot tubs displayed at Saks Fifth Avenue Mens Department at Mazza Gallerie in D.C. for their fashion event and benefit on September 20. The event was hosted by Will Thomas of Fox 5 and had featured designers Chip and Pepper Foster. It was fun to have a Hot Spring Spa at Saks!

Listen to your iPod in your new Hot Spring Spa

Now that you have all of your favorite songs on your iPod, you can listen to them while relaxing in your spa. Hot Springs has introduced the new music system - **SpAudioCast™**. The main component of the SpAudioCast system is an **exclusively customized iCast™ system**, which includes a receiver and transmitter. Using **wireless technology**, the iCast system lets the user dock their iPod securely inside the home while the music is transmitted to a receiver installed in select Hot Spring spa's equipment compartment.

The advanced technology of the iCast system enables a **variety of audio sources** to be played through a wireless transmitter.

The SpAudioCast system is compatible with all of the following:

- Apple iPod
- Personal Music Player (e.g. MP3)
- TV (audio only)
- CD/DVD Player
- AM/FM Radio
- Satellite Radio
- Cable Music Channels

- iTunes and audio files saved directly to a personal computer
- Virtually any audio device with a line out

With SpAudioCast, consumers can utilize the transmitter, located within their home, to play their iPod or other audio source through their home stereo system. As with the SpAudio® II system, consumers can enjoy the SpAudioCast system even when they aren't using the spa because the external speakers make this system ideal for backyard entertaining. If you are already the owner of the SpAudio stereo system or an Aria Spa, you can just purchase the iCast system alone.

The optional **Moonlight music system** uses the same wireless transmitter and receiver technology as the SpAudioCast system. Instead of transducer technology, it features two powerful external speakers that are mounted on the side of the spa cabinet.

The speakers can be adjusted to direct sound either into or away from the spa, when the spa is not in use, so you can enjoy the benefits of wireless audio technology while entertaining outdoors!

The **SpAudioCast™** and **Moonlight** systems are available on spas purchased after 2004 or brand new Hot Spring Grandee, Vista, Envoy and Vanguard hot tubs. Come see these systems at our VIP nights and talk to us about our Trade-In event taking place in October and November.

GREAT TRADE-IN EVENT! – OCTOBER & NOVEMBER ONLY

If you've considered buying a new spa, now is the time! When you trade your current spa for a new one, you'll save big! Plus, all new spas come with a complete warranty. You can't lose!

Fall Checklist

for your spa cover

- ✔ **Adjust water chemistry** on a regular basis, even if your spa is not in use. Bad water chemistry can cause mildew to your cover by Spring time. Your cover will last longer if the water is clean and the pH is correct.
- ✔ **Clean your cover before the cold weather comes.** Either take your cover off your spa to clean it on the grass or be very careful to not get any soap in the spa. Take a garden hose and spray your cover to loosen and rinse away dirt and debris. Using a large sponge or a soft bristle brush and a very mild soap solution (1 teaspoon dish washing liquid with 2 gallons of water) or baking soda (sodium bicarbonate), scrub the vinyl top in a circular motion. Don't allow the vinyl top to dry with a soap film on it before it is rinsed clean. Scrub the perimeter and side flaps then rinse clean. Rinse off the underside of the cover (use no soap) and wipe clean with a dry rag.
- ✔ **Condition the top of your vinyl cover** at least once before the first snow or ice, and if possible monthly during the winter. Apply Hot Spring Cover Shield to the vinyl surface with a soft cloth, then buff to a high luster. This will keep the vinyl supple and keep it from drying out under harsh winter conditions. Be sure to use Hot Spring's Cover Shield. Do not use Armor All.
- ✔ **Remove snow, ice and leaves** from the top of your cover. Only use a soft broom (no shovels or rakes...this will tear the vinyl). Keeping snow loads from accumulating will preserve the integrity of your foam cores. Removing ice can avoid punctures to the vinyl. Regular removal of leaves will help the vinyl last longer.
- ✔ **Lock down your cover straps** to avoid high winds from pulling your cover off. If your backyard is really windy, you may want to consider buying Sunstar's Hold-Down Straps that can be purchased at our VIP nights. If safety locks get stuck, try using WD-40 to free them up.

for your spa

- ✔ **Clean your filters monthly**
This is a must. Even if you don't plan on using your spa for a while, you should clean the filters. Clogged filters can shut your spa off. A spa shut off in freezing temperatures may cause damage to your spa's equipment.
- ✔ **Replace your filters if:**
 - More than 2 years old
 - The filters are brown, gray, or green and don't rinse clean.
 - Hot tub transferred to a new owner
 - Pleats lost their fibrous sheen
 - The filter top or bottom have cracks or splits.
- ✔ **Replace your AG+ Silver Ion Cartridge every 3-4 months**
- ✔ **Test the water's temperature** with your hands periodically. You want to make sure your spa hasn't shut off especially in the winter
- ✔ **Change your water at least twice a year.** Fall and Spring are a great time to drain and refill your water. Don't do this in the winter when it's freezing out. The spa may not be able to heat up the water fast enough before freezing.
- ✔ **Clean your spa's shell** with a mild non-abrasive non-sudsing cleanser and a soft rag or nylon scrubber to remove dirt build-up. Baking soda can also be used for minor surface cleaning.
- ✔ **When refilling your spa's water,** place the hose in the filter compartment and then start the water. This will keep air from getting trapped in the heating system.
- ✔ **Keep your spa on** and the temperature up even if you're not planning on using it for a while. Our spas are so energy efficient, why not leave them hot?

VIP Nights

Great Night For Your Friends to Buy and For You to Trade-in
